ABSTRACT

Articles published in "The Communicator," journal of the New York State Outdoor Education Association, are listed by author and subject in this first complete index to the publication. The 244 articles indexed, having appeared in issues from the very first one in March 1969 through the spring 1977 issue, present ideas and resources related to outdoor and environmental education. Entries in the author index are numbered in alphabetical order and provide title, publication date, and page number. In the subject index of 67 topics, numbers refer readers to the author index for title of the article and other publication facts. Subjects having the most articles listed under them include curriculum, ecology, multidisciplinary, natural history, outdoor education program, philosophy, and teacher tips. (RS)

INTRODUCTION

The Communicator, as all of you know, is the finest ideas and resources publication dealing with outdoor and environmental education available anywhere. The New York State Outdoor Education Association is justly proud of the quality of this journal. Through the contributions of the membership and the dedication of its editors and the NYSOEA Executive Board, The Communicator has gained both national and international recognition.

A comprehensive index to the contents of The Communicator has been needed for some time. In an attempt to meet this need the NYSOEA Executive Board directed the Resource Services Committee to index the back issues. This index is the result. It is hoped that yearly supplements will be added as new issues are published. This index will facilitate the location and use of the many resources to be found in past Communicators.

Back issues of The Communicator may be located in many libraries and from many NYSOEA members. The Outdoor Education Index and Supplements from ERIC/CRESS contain abstracts of Communicator articles. There is also the possibility that The Communicator may be available on microfilm in the future.

This index has been developed by the Resource Services Committee of the NYSOEA, under Vice-President of Resource Services Bruce Matthews. Special recognition and thanks must be given to Mrs. Anita Schmidt and Mr. Daniel Tracy, students at S.U.C. Cortland in Recreation Education, for doing the research and developing this index. The NYSOEA is grateful for the efforts of these folks.
